

Attachment C
Sustainability Subcommittee Summary
March 9, 2016

Transportation Element

- Agreement to remove Policy T-1.1
- Agreement that sustainability definition shall be a call out (Use EPA definition)
- Per Council direction, need flexibility in policy/program language
- Program T.1.2.1
Delete all text after “Create a long-term education program to change the travel habits of residents, visitors, and workers”.
- Policy T-1.8
Add “including health and sustainability” after “transportation network”.
Should now read: “Continue to measure the effectiveness of the City’s transportation network, including health and sustainability, to make better decisions on transportation issues, and consider the use of parking fees and tax revenues to fund alternative transportation projects.”
- As parking demand is diminished, consider other uses (such as more greenery) to replace.
- No drones allowed in natural open space or baylands. Need policy and program against drones.
