

This preliminary draft chapter was prepared by City staff on the basis of input from the CAC subcommittee, members of the public, and staff from other departments received in February and March 2017. The chapter will be reviewed by the full CAC on March 21, 2017.

IMPLEMENTATION

***VISION:** Palo Alto's Implementation Plan is intended to provide an overview of priorities for future actions to accomplish the goals of the Comprehensive Plan. It provides a key mechanism to link Comprehensive Plan implementation to Palo Alto's budget process, and it will ultimately be ~~the~~ a yardstick against which Palo Alto can measure its Comprehensive Plan accomplishments.*

Palo Alto's Comprehensive Plan will be implemented both through the day-to-day decisions that rely on its vision, goals, and policies, as well as the implementation programs identified in this chapter. All substantive decisions about development projects, capital improvements, zoning changes, and other plans and policies affecting land use, transportation, and the physical environment will be reviewed for conformance with this Comprehensive Plan, thus advancing the Plan's overall vision and policy framework. To complement the implementation of this plan that will occur as a review of individual decisions are made, the City has identified a list of implementation programs intended to provide an overall sense of the priorities for future actions in support of accomplishing the goals of the Comprehensive Plan. This list provides the key mechanism to link Comprehensive Plan implementation to Palo Alto budget process, and it can be used as one yardstick against which Palo Alto can measure its Comprehensive Plan accomplishments.

The following table presents programs the City wants to undertake to help achieve the goals in the Comprehensive Plan, to the extent that resources are available. The programs in the Implementation Table describe and prioritize actions to implement various aspects of the Comprehensive Plan goals and policies. Some programs are already budgeted and ongoing, while the City Council will need to identify resources during future budget cycles in order to implement other programs. The Planning & Transportation Commission may recommend changing priorities or adding or subtracting programs in the course of their annual review, and staff may likewise

recommend prioritization or funding during the annual budget process. The City Council may change the prioritization of programs through the regular five year review cycle of the Comprehensive Plan's implementation.

PRIORITIES

At the adoption of this Plan in 2017, the City sees the following three broad priorities:

- Increase Affordable Housing
- Reduce Single-Occupant Vehicle Trips
- Protect the Natural Environment

FORMAT OF THE IMPLEMENTATION TABLE

For each program, the Implementation Table identifies the following:

- **Lead Department or Agency:** The City Department that would have primary responsibility for tracking and completing the program. Note that many programs will require collaboration between multiple departments as well as outside agencies; collaboration with appropriate parties would be coordinated by the Lead Department named in this column.
- **Relative Priority:** While it would be desirable to pursue every program and policy immediately, priorities must be established to focus the City's efforts and to allocate the City's resources (City Council emphasis, staff time and budget resources). With resource constraints and changing circumstances, it is expected that the relative priorities identified here may change over time. Also, given these constraints together with the breadth of programs included, the City anticipates and expects that it will not be able to complete all of the programs listed. Five priorities are used:
 - **R:** "routine" activities that are part of the normal course of business for staff;
 - **IP:** In progress - programs that are already underway to complete a specific, defined work effort;
 - **S:** Short term priority typically means the program would be implemented or completed within the first five years after Comprehensive Plan adoption;

- **M:** medium term priority typically means roughly within five to ten years; and
 - **L:** long-term means the program is ten years or more away.
- **Anticipated Level of Effort:** gives an order-of-magnitude of cost. It is difficult to determine the exact cost of most of the programs and the specific staffing requirements needed to support the scope of future detailed work plans. In general, physical improvements and major planning efforts are the most expensive type of investment the City can make; revisions to existing plans or studies would likely fall in the middle of the range; and some ongoing staff roles such as providing education or some one-time activities would be least expensive.

RESOURCES

Although Palo Alto would like to implement all these programs during the term of this Plan, there are capital resource and staffing limitations as well as limitations to the amount of work that the City and the City Council can focus on effectively during this period. The completion of actions is contingent upon the availability of funding resources. Issues that cannot be anticipated may arise in the future that may act to divert resources from the programs and priorities of the Comprehensive Plan. It is hoped that by acknowledging and focusing on Comprehensive Plan priorities, the City can avoid diversion of resources and attention.

REVIEW AND UPDATE

The Comprehensive Plan is a living document. Palo Alto's priorities will evolve through the life of this Plan, and therefore changes will need to be made to the Implementation Plan. Annually, as required by State Law and the Municipal Code, the Planning and Transportation Commission will do a report to the City Council on the status of the Comprehensive Plan and its implementation. This review can be combined with the Commission's review of the City's capital improvement program (CIP), which also occurs on an annual basis.

CONCLUSION

The Implementation Plan was designed to advance the overarching vision and themes of the Comprehensive Plan. The City recognizes there are resource constraints and a need to focus those resources.

S2.7.1	As part of the construction permitting process for proposed new and redeveloped buildings in areas of identified hazard shown on MapS-2, structures that would affect the most people in a seismic event require submittal to the City of a geotechnical/seismic report that identifies specific risks and appropriate mitigation measures.	Development Services Department	S	E	\$	
S2.7.2	Review and update, as appropriate, City code requirements for excavation, grading, filling and construction to ensure that they conform to currently accepted and adopted State standards.	Department of Public Works	M	E	\$	
S2.7.3	Utilize the results of Palo Alto's Seismic Hazards Identification Program and inventory of potentially seismically vulnerable building types to establish priorities and consider incentives to encourage structural retrofits.	Planning & Community Environment Department	S	N	\$	
S2.8.1	Implement flood mitigation requirements of FEMA in Special Flood Hazard Areas as illustrated on the Flood Insurance Rate Maps.	Department of Public Works	R	E	\$\$\$	Relative Priority – Ongoing > R
S2.8.2	Continue participating in FEMA's Community Rating System to reduce flood insurance for local residents and businesses and strive to improve Palo Alto's rating in order to lower the cost of flood insurance.	Department of Public Works	R	N	\$	Relative Priority – Ongoing > R
S2.8.3	Partner with appropriate agencies to expand flood zones as appropriate due to sea level rise, changes in creek channels, sheet flooding or storm drain overload due to increased likelihood of extreme storm events caused by climate change.
